

The SNAME Texas A&M at Galveston Student Section has been reactivated!!! The first meeting was held on February 6, 2006. The meeting produced a great turnout and we are certain that we will continue to gain more members. Students have a huge interest in welcoming professionals to come to see what we have to offer here in Galveston, and feel that this organization will definitely help them network with professionals. They are also excited about the opportunity to attend conferences, enter competitions and to use the knowledge that they have gained so far.

We have a resume workshop planned for a the Student Section in the near future, at which point the SNAME student members will be able to proudly share their resumes in career fairs and in their job searches.

As a united group of engineering students, the SNAME Student Members will fulfill the interests of the Marine Systems Engineering program and the Marine Engineering Technology program. We look forward to establishing a firm relationship with the Student Steering Committee through Clark Maxwell, an officer of the SSC and an engineering student at Texas A&M at Galveston, and Matthew Unger, Chairman of the SSC.

Our current officers are:

Chairman: Folabi Bolatiwa
Vice-Chairman: Jose Angel Rocha
Secretary: Marissa Myers
Treasurer: Rachael Bono
