

Additional Information for Authors of Accepted Abstracts:

- At least one author from all accepted papers must register for and attend SMC 2023.
- SMC authors are not allowed to submit abstracts to more than one conference at a time. SNAME reserves the right to decline an abstract prior to being submitted to another conference for consideration.
- Please note that SNAME does not allow commercialization in formal presentations or published papers. Authors and presenters are generally expected to provide their professional affiliations, and where appropriate, to acknowledge support received, including that received from commercial concerns. However, the use of trademarked names, display of corporate logos, or analogous practices is discouraged. You can find detailed information on SNAME Publication Policies on the website by following the link <https://www.sname.org/author-opportunities>.

Requirements for Paper Submissions (All Content Types):

- Papers must not be less than 12 nor more than 25 pages in length.
- A list of references must be included.
- Papers must be complete – those authors who, due to submission date constraints, are waiting for physical test or detailed analysis results for part of the material they are presenting are obligated to include a description of what the missing data or analysis is expected to show that can be replaced when the actual data or results are available. Simply putting a section heading followed by words like “This section to be completed after data is available” is NOT acceptable. Clearly labeled placeholders for tables and figures are required to allow assessment of overall length. NOTE: Missing material must be available in time to be included with the second draft submission which is due not later than 02 June 2023.
